## Checklist of the Birds of for Hamlin Beach State Park

*Hamlin Beach State Park was established in 1938 and is located on Lake Ontario along the Atlantic flyway. Today the park consists of over 1,200 acres of shoreline, marsh, numerous small woodlots, conifer plantations, scrublands and fields. Waterfowl and shorebird concentrations, as well as the spring hawk migration, can be spectacular. More than 310 species of birds have been recorded here with over 80 species nesting in the park's diverse habitats. Perhaps the best birding is available on the east side of the park along the Yanty Creek Nature Trail.*

### Seasons
